

Please Provide Your Feedback

1. Overall was the information provided on the flyer useful to your practice? Yes No
2. In your practice, do you use guaiac-based tests or fecal immunochemical tests (FIT) to detect the presence of fecal occult blood? Guaiac-based FIT Neither
3. If you do not currently use fecal immunochemical tests (FIT) in your practice, after reading this information, are you more likely to use FIT? Yes No
4. Before reading this material were you aware of the following benefits of FIT vs. guaiac-based tests?
- a. Higher sensitivity/specificity for detecting cancer, advanced adenomas and colorectal neoplasm.
 Yes No
 - b. Dietary restriction is not necessary before stool collection.
 Yes No
 - c. Medication restriction is not necessary before stool collection.
 Yes No
 - d. Detects globin rather than heme from the hemoglobin molecule, making it highly specific for lower gastrointestinal bleeding.
 Yes No
5. Would you like any additional information regarding FITs? Yes No
If yes, please specify and provide your contact information:
